

Recent Publications

Medical AI Paper & Dataset Publications — LinkedIn Sample

Scope: Medical AI / deep learning for medical imaging & diagnostics, sourced from LinkedIn content search (same field as the reference post on skin cancer classification, *Diagnostics* MDPI). Window: **January 2025 – September 16, 2026**.

Total entries: 21 | **Papers:** 19 | **New dataset releases:** 2

Note: This is a sample compiled from LinkedIn content search, not an exhaustive census — LinkedIn's search interface does not expose a countable total of matching posts. Results below are what a structured set of targeted searches (under an authenticated LinkedIn session) surfaced and manually screened for recency and relevance, not every qualifying post that exists.

Papers

1. Benchmarking Class Imbalance Mitigation Strategies Across Deep CNN Architectures for Skin Cancer Classification

Field: Medical Imaging - Dermatology/Skin Cancer

Authors / Poster: Dr. Irshad Ahmad, Muhammad Khubaib, Saleh Altowaijri

Venue: *Diagnostics* (MDPI), peer-reviewed

Dataset Used: ISIC 2019

Link / DOI: https://lnkd.in/dJggGe_p

Publication Date: Not specified (recent 2026 issue)

LinkedIn Post Recency (as of Sept 16, 2026): 22h

Source Type: Individual (author, direct share)

Benchmarked 16 class-imbalance mitigation methods across 6 pretrained CNN architectures (EfficientNet-B0/B3, ResNet50, DenseNet121, InceptionV3, MobileNetV2) for skin lesion classification. Best result: Balanced MixUp + EfficientNet-B3, 92.39% accuracy / 92.33% F1. This is the reference post the user linked.

2. Attention-Guided EfficientNet-B3 with Grad-CAM Visualization for 22-Class Bone Fracture and Anatomical-Region Classification on the MultiBoneX Dataset

Field: Medical Imaging - Orthopedics/Bone Fracture

Authors / Poster: Mian Hafeez, with Dr. Irshad Ahmad and Saleh Altowaijri

Venue: *Diagnostics* (MDPI), Vol 16, Issue 17, Article 2841

Dataset Used: MultiBoneX Dataset

Link / DOI: [10.3390/diagnostics16172841](https://doi.org/10.3390/diagnostics16172841) / <https://lnkd.in/dUxE8ETq>

Publication Date: 3 September 2026

LinkedIn Post Recency (as of Sept 16, 2026): 6d

Source Type: Individual (author, direct share)

22-class deep learning framework for bone fracture and anatomical-region classification from imaging; 75.03% test accuracy using EfficientNet-B3 with CBAM, with Grad-CAM interpretability.

3. A Preliminary Comparison of EfficientNet-B3 and ResNet-50 for Detection and Subtype Classification of Intracranial Hemorrhage on Head Computed Tomography

Field: Medical Imaging - Radiology/Neuroimaging

Authors / Poster: Leena Faraz and co-authors (incl. Awais Jan, Maryam Sajjad, Muhammad Hammad Hassan Mallick, Muhammad Mohsin, Bushra Ashar)

Venue: Journal of Saidu Medical College (JSMC)

Dataset Used: Not specified (head CT scans)

Link / DOI: <https://lnkd.in/dy7y-UT9>

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 4d

Source Type: Individual (author, direct share)

Evaluated deep learning architectures to detect and classify intracranial hemorrhage (ICH) subtypes from head CT scans, reporting high patient-level sensitivity and ROC-AUC.

4. Lung Cancer Detection Using Medical Image Processing

Field: Medical Imaging - Oncology/Lung Cancer

Authors / Poster: Paarth Kapur, Alekhya Gorugantu, Rujuta Ashtekar (mentored by Dr. Nandana Prabhu, Dr. Renuka Ashtekar)

Venue: Springer, Proceedings of ICAIN 2025 (Lecture Notes in Networks and Systems), book chapter, Vol. 5

Dataset Used: CT scan lung cancer imaging dataset (not further specified)

Link / DOI: [10.1007/978-3-032-23314-1_12](https://doi.org/10.1007/978-3-032-23314-1_12)

Publication Date: 2025 (ICAIN 2025 proceedings)

LinkedIn Post Recency (as of Sept 16, 2026): 2w

Source Type: Individual (author, direct share)

Compared DenseNet201, ResNet50, a hybrid DenseNet201-ResNet50, and EfficientNet-B3 (via transfer learning) for 4-class lung cancer classification from CT scans; EfficientNet-B3 achieved 94.29% test accuracy.

5. Multi-approach technique implementation for segmentation of left ventricular myocardial infarction and quantification

Field: Medical Imaging - Cardiology

Authors / Poster: Dr. Kavitha K.S. (Dayananda Sagar College of Engineering, Dept. of CSE)

Venue: Scientific Reports

Dataset Used: Not specified (cardiac imaging)

Publication Date: 6 August 2026

LinkedIn Post Recency (as of Sept 16, 2026): 3w

Source Type: Institution (direct share)

Combines image preprocessing, deep learning and optimisation-based approaches to improve identification and measurement of left ventricular myocardial infarction from medical images.

6. Artificial Intelligence in Healthcare Practice: Validation, Fairness, and Regulatory Challenges

Field: Medical AI - Systematic Review (Healthcare/Diagnostics broadly)

Authors / Poster: Ghulam Hussain Noori, Shaista Bibi, Seung Won Lee

Venue: INQUIRY: The Journal of Health Care Organization, Provision, and Financing (Sage)

Dataset Used: N/A (systematic review of 20 clinical AI studies, 2020-2025)

Link / DOI: https://lnkd.in/d2bFG8_F

Publication Date: Not specified (2025-2026)

LinkedIn Post Recency (as of Sept 16, 2026): 5d

Source Type: Individual (author, direct share)

Systematic review of clinical AI (2020-2025): deep learning/CNNs dominate medical imaging diagnostics (median 0.91 AUC); top domains Radiology (30%), Oncology (20%), Cardiology (15%); identifies regulatory, transparency, data-quality, and workflow barriers to adoption.

7. An Intelligent Gene Biomarker Identification Framework for Pan-Cancer Classification using Genetic Algorithms and Deep Learning

Field: Medical AI - Oncology/Genomics

Authors / Poster: Aruja Tiwary (1st author), Lubhana Mutha, Daksh Patil, Dr. Hima Deepthi Vankayalapati, Prof. Prateeksha Shanoj

Venue: IEEE, Proceedings of International Conference on Bioinformatics and Computational Biology (ICBCB 2026)

Dataset Used: TCGA (The Cancer Genome Atlas) - 10,459 patient samples

Link / DOI: 10.1109/ICBCB69424.2026.11621848

Publication Date: 2026 (ICBCB 2026 proceedings)

LinkedIn Post Recency (as of Sept 16, 2026): 4w / 1mo

Source Type: Individual (author, direct share)

Used a Genetic Algorithm to select an informative gene subset from TCGA data, then trained TabNet and SAINT attention-based models to classify 33 cancer types; SAINT reached 98.76% accuracy on cancer detection, 95.60% across all 33 tumor types. Shared separately by two co-authors (Aruja Tiwary and Lubhana Mutha); counted once here.

8. Cross-Domain Transfer Learning and Self-Supervised Representation Learning for Automated Histopathological Image Classification in Colorectal Cancer Grading System

Field: Medical Imaging - Oncology/Histopathology

Authors / Poster: Jeya Sherlyne P

Venue: IEEE

Dataset Used: Histopathological image dataset (not further specified)

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 3w

Source Type: Individual (author, direct share)

Automated framework for colorectal cancer grading from histopathological images combining cross-domain transfer learning, self-supervised representation learning, Swin Transformer, and Grad-CAM explainability. Author's earlier related paper (skin lesion classification with ConvNeXTv2) referenced but not separately dated/counted.

9. A Comparative Experimental Study of DenseNet121, EfficientNetB7, MobileNetV2, and ConvNeXTV2 for Breast Cancer Classification

Field: Medical Imaging - Oncology/Breast Cancer

Authors / Poster: HirenKumar Kukadiya & Divyakant Meva (highlighted by IJATCA journal)

Venue: International Journal of Advanced Trends in Computer Applications (IJATCA)

Dataset Used: Mammographic imaging dataset (not further specified)

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 3w

Source Type: Journal (aggregator/publisher share)

Comparative study of 4 deep learning architectures for breast cancer classification using mammographic images.

10. AI-Driven Multimodal Deep Learning Framework for Automated Lung and Skin Cancer Detection and Classification from Medical Images

Field: Medical Imaging - Oncology/Lung & Skin Cancer

Authors / Poster: Palagummi Syam Kumar, Namadi Jeevana Dheepa, Thummalapalli N S S Siddhardha, Bokka Ganapathi, Bogabattina Venkata Manikanta

Venue: International Journal for Research Trends and Innovation (IJRTI), Vol 11, Issue 8

Dataset Used: Not specified (medical imaging data)

Link / DOI: Paper ID IJRTI2608060

Publication Date: August 2026

LinkedIn Post Recency (as of Sept 16, 2026): 4w

Source Type: Individual (author, direct share)

Multimodal deep learning framework for automated detection/classification of lung and skin cancer from medical images.

11. Skin Cancer Classification Using Deep Learning Techniques

Field: Medical Imaging - Dermatology/Skin Cancer

Authors / Poster: Vandana H, Arpitha V G, Anvitha GH, Neha Khanum (guided by Dr Uma Mahesh R N)

Venue: IEEE Xplore, Annual International Conference on Data Science, Machine Learning and Blockchain Technology (AICDMB-2025)

Dataset Used: Not specified

Link / DOI: <https://lnkd.in/ggqssuNT>

Publication Date: 2025

LinkedIn Post Recency (as of Sept 16, 2026): 9mo

Source Type: Individual (author, direct share)

Mini-project research paper on skin cancer classification using deep learning techniques, presented at AICDMB-2025.

12. Skin Cancer Classification using Machine Learning

Field: Medical Imaging - Dermatology/Skin Cancer

Authors / Poster: Kavya S., Himanshu Chauhan, Krishna Kumar (mentored by Dr Dhyanendra Jain)

Venue: IEEE Xplore, International Conference on Innovative Practices in Technology and Management (2026)

Dataset Used: Dermoscopic image dataset (not further specified)

Link / DOI: <https://lnkd.in/g3MAAkeZ>

Publication Date: 2026

LinkedIn Post Recency (as of Sept 16, 2026): 4mo

Source Type: Individual (author, direct share)

Web-based deep learning system for skin cancer classification from dermoscopic images; ~94.28% accuracy with CNN across 7 lesion types; deployed as a browser-based React/TensorFlow.js app for real-time predictions.

13. Multi-Class Classification of Cervical Cancer Cells Using Deep Learning Techniques

Field: Medical Imaging - Oncology/Cervical Cancer

Authors / Poster: E. Anisha Patra

Venue: TANZ Research Journal

Dataset Used: Not specified (cervical cancer cell imaging)

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 4mo

Source Type: Individual (author, direct share)

Applies deep learning techniques to improve accuracy/efficiency of cervical cancer cell classification for early detection.

14. An Optimized Framework for Accurate Skin Cancer Classification

Field: Medical Imaging - Dermatology/Skin Cancer

Authors / Poster: Parthasarathy M and co-authors

Venue: IEEE Xplore, 2025 IConSCEPT conference

Dataset Used: Not specified

Link / DOI: <https://lnkd.in/gSpTuhyn>

Publication Date: 2025

LinkedIn Post Recency (as of Sept 16, 2026): 5mo

Source Type: Individual (author, direct share)

Hybrid deep learning approach integrating a DenseNet201 backbone with a custom CNN architecture to improve detection of malignant skin conditions.

15. HistAdvNet: A Robust Deep Learning Framework for Histopathology Classification Under Adversarial Conditions

Field: Medical Imaging - Oncology/Histopathology

Authors / Poster: Sazzad Hossain and co-authors

Venue: Biomedical Signal Processing and Control (Elsevier, Q1 journal)

Dataset Used: Lung and colon cancer histopathology image datasets

Link / DOI: <https://lnkd.in/gWWn7KJJ>

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 3mo

Source Type: Individual (author, direct share)

Novel lightweight deep learning framework (HistAdvNet) for lung and colon cancer histopathology image classification with strong robustness against adversarial attacks.

16. Convolutional Neural Network for Lung Cancer Prediction and Classification

Field: Medical Imaging - Oncology/Lung Cancer

Authors / Poster: JAMI Jaswanth, Palameti Reddy Lakshmi Manoj (guided by Mrs. Sakthi U)

Venue: IEEE Xplore Digital Library

Dataset Used: CT scan imaging dataset (not further specified)

Link / DOI: <https://lnkd.in/dA-HzVkc>

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 2mo

Source Type: Individual (author, direct share)

Uses deep learning/CNNs for prediction and classification of lung cancer from CT scan images.

17. Colon Cancer Classification from Histopathological Images Using Convolutional Neural Networks

Field: Medical Imaging - Oncology/Colon Cancer

Authors / Poster: Yuvashree M

Venue: International Research Journal on Advanced Engineering and Management (IRJAEM), Vol 04, Issue 03

Dataset Used: Histopathological image dataset (not further specified)

Publication Date: March 2026

LinkedIn Post Recency (as of Sept 16, 2026): 5mo

Source Type: Individual (author, direct share)

Applies deep learning/CNN techniques to improve accuracy of colon cancer detection from histopathological medical images.

18. NeuroTrustNet: A Cost-Effective Multimodal Ensemble Framework for Brain Tumor Classification Under Cross-Dataset Variability

Field: Medical Imaging - Neurology/Brain Tumor

Authors / Poster: Ferdaus Ibne Aziz (1st author), Tumennast E. (supervisor/co-author)

Venue: Frontiers in Artificial Intelligence (Impact Factor 6.7)

Dataset Used: Multiple external MRI datasets (cross-dataset evaluation)

Link / DOI: <https://lnkd.in/gDc7exVe>

Publication Date: 11 September 2026

LinkedIn Post Recency (as of Sept 16, 2026): 4d

Source Type: Individual (author, direct share)

Multimodal AI framework (CNNs + Vision Transformers + radiomic features via Adaptive Attention Stacking) for brain tumor classification; 94% accuracy on a completely unseen external dataset.

19. An explainable deep learning approach for automated detection and grading of diabetic retinopathy from fundus images

Field: Medical Imaging - Ophthalmology/Diabetic Retinopathy

Authors / Poster: Marisa Oishy and co-authors (incl. Muradul Islam; supervised by Ferdaus Anam Jibon, Gahangir Hossain)

Venue: Microvascular Research (Elsevier), Q1/Q2 journal

Dataset Used: Fundus image dataset (not further specified)

Link / DOI: <https://lnkd.in/g8Q9U4Yg>

Publication Date: 2026 (available online)

LinkedIn Post Recency (as of Sept 16, 2026): 4d

Source Type: Individual (author, direct share)

Hybrid and explainable deep learning approach for automated detection and grading of diabetic retinopathy from fundus images; began as an undergraduate thesis.

New Dataset Releases

20. RACLETTE: Realistic Synthetic Aortic 4D/5D Flow MRI with Computational Enhancement for Training and Testing Algorithms

Field: Medical Imaging - Cardiovascular MRI

Authors / Poster: Pietro Dirix, Stefano Buoso, Sebastian Kozerke (ETH Zurich Cardiovascular Magnetic Resonance Group)

Venue: Open dataset release (ETH Zurich)

Dataset Used: N/A - this is the new dataset

Link / DOI: <https://lnkd.in/ebHTrGSB>

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 2mo

Source Type: Individual (author, direct share)

New public open dataset combining CFD simulations with MRI signal modeling for cardiovascular MRI research: 189 virtual subjects (Aortic 4D Flow MRI) + 25 virtual subjects (Aortic 5D Flow MRI), enabling reproducible benchmarking of reconstruction/segmentation/hemodynamic quantification algorithms.

21. COBRA2026: A large-scale pelvic cone-beam CT projection dataset

Field: Medical Imaging - Radiotherapy/CBCT

Authors / Poster: Adrian Thummerer and co-authors (incl. Lukas Zimmermann, Simon Rit, Florian Kamp, Matteo Maspero, Guillaume Landry, and others; 6 European radiotherapy centers)

Venue: New dataset release, associated with COBRA2026 Deep Learning Challenge (MIDL 2027)

Dataset Used: N/A - this is the new dataset

Link / DOI: <https://lnkd.in/dSB9dZYz>

Publication Date: Not specified

LinkedIn Post Recency (as of Sept 16, 2026): 1mo

Source Type: Individual (author, direct share)

New large-scale dataset of 867 pelvic CBCT acquisitions (~950GB) from 6 European radiotherapy centers (Elekta/Varian systems), including raw projection data, planning CTs, and simulated projections, to support reproducible benchmarking of deep learning-based CBCT reconstruction and image correction methods.

Compiled via LinkedIn content search under an authenticated LinkedIn session (Sunanda Biswas). See the companion Excel workbook (Medical_AI_Paper_Dataset_Publications_LinkedIn.xlsx) and annotated bibliography (Annotated_Bibliography_Medical_AI_LinkedIn.docx) for the same data in spreadsheet and annotated-bibliography table formats.
